

Canvas #06

Details of datasets

Designed by: _____

Date: _____

| BONUS POINTS 1 to 5 (1 = hard, 5 = easy) | Explanations | Dataset 1: _____ | Dataset 2: _____ | Dataset 3: _____ |
|--|--|---------------------|---------------------|---------------------|
| Machine readable? | <i>if the data is in a .docx or pdf file, software can't read it. A database or even a csv file is better.</i> | | | |
| Structured or not? | <i>if the dataset is "Excel like" then it is quite structured. Free text, web pages or pictures are typically very unstructured.</i> | | | |
| Personal and sensitive data? | <i>Personal data comes with more constraints. Sensitive data even more.</i> | | | |
| Complete? | <i>No missing records, years, values, and no errors.</i> | | | |
| Sum of points per dataset | <i>Add up the points to get a total. A higher total would suggest that the dataset will be easier to manage</i> | | | |
